Bio

I am a highly motivated and results-driven developer with a passion for continuous learning, eager to take on new challenges and advance my skills in a dynamic, fast-paced environment. I am a dedicated and enthusiastic professional, committed to achieving high performance standards and delivering outstanding results. With a proven track record of success in leveraging my skills and experience to drive innovation and improve productivity, I am confident in my ability to make a valuable contribution to any team.

Skills

Ensuring the technical feasibility of UI/UX | Version updates with Git | Search Engine Optimization | Proficient in the use of JQuery,React React Native,Redux,Next.js,Mongoose,Express.js, D3.js, and Node.js | Excellent knowledge of HTML, CSS, SASS, TypeScript and JavaScript | C# | Microsoft Office/ Google Docs and Adobe photoshop | Time management | Creative problem solving skills | Communication | Resourcefulness | Interpersonal Skills | Adaptability | Attention to details | Analytical Skills

Experience

LAWPAVILION / React Frontend Developer

APRIL 2024 - PRESENT

- Developed and maintained reusable React components for Law Pavilion's web applications, such as Addon Manager Dashboard, Addon Manager,NBA stamp and seal, LP content manager, promoting code efficiency and reducing development time.
- Implemented responsive design principles to ensure Law Pavilion's applications function flawlessly across various devices (desktops, tablets, mobiles).

- Utilized React best practices (e.g., state management, routing) to build performant and scalable web applications for Law Pavilion.
- Collaborated with designers and back-end developers to translate UI/UX mockups and APIs into functional React components for Law Pavilion's applications.
- Successfully migrated existing Law Pavilion applications or functionalities to React, improving maintainability and user experience.
- Maintained clear communication with product managers and testers throughout the development lifecycle, incorporating feedback to iterate and refine the user experience.

Freelance Front-End Developer

AUGUST 2023 - APRIL 2024

- **Reeple Company Website Development:** Aided development of Reeple's corporate website, focusing on creating a dynamic, user-friendly interface that enhances user engagement and streamlines content delivery. Implemented advanced React components and integrated RESTful APIs for real-time data processing, ensuring a seamless user experience.
- **Arbitalai Platform Development:** Aided the front-end development of Arbitalai's online platform, a project that demanded innovative solutions for complex data visualization and user interaction. Utilized the latest in React technologies and state management libraries to build a robust, scalable application that supports Arbitalai's mission to provide intuitive, accessible data analytics.

In both projects, I worked closely with clients to understand their vision and requirements, translating these into high-performance web solutions. My role involved:

- Designing and implementing responsive web layouts that adapt to various devices and screen sizes.
- Ensuring optimal performance and scalability of web applications through advanced optimization techniques.
- Collaborating with back-end developers to integrate APIs and manage data flow effectively.
- Conducting thorough testing and debugging to guarantee a flawless user experience.
- Utilizing Git for version control and collaboration.

Flavetech / Software Developer

May 2022 - PRESENT, LAGOS, NIGERIA

Here are some of the things I did:

- Developed a School Management portal, responsible for managing staff, students, and parent information.
- Created a Product Management Website, including features for pin management and generation.
- Developed a Computer-based Test and Examination Website, managing the creation of examination questions and answers.
- Leveraged the inbuilt React toolkit for creating frontend features.
- Created and maintained a version control system (e.g., Git) to track changes and collaborate with the development team effectively.
- Integrated designs within the application code.
- Wrote application interface codes with JavaScript.
- Enhanced application performance with constant monitoring.
- Translated designs into good quality code.
- Assessed UX and UI designs for technical feasibility,
- Enabled components to work seamlessly across different browsers and devices.
- Ensured proper user information authentication
- Collaborated with other developer team members and the design team to implement new feature developments.
- Thoroughly reviewed application needs and interfacing elements.

The Yutes / Frontend Developer

MAY 2021 - MAY 2022, LAGOS

Here are some of the things I did:

- Collaborated with the design team to translate their creative vision into interactive and visually appealing web elements.
- Integrated third-party APIs for e-commerce features, including payment gateways, user accounts, and product catalog management.
- Conducted regular code reviews and testing to ensure cross-browser compatibility, accessibility, and compliance with web standards.
- Provided continuous maintenance and updates to keep the website aligned with changing fashion trends and industry standards.
- Collaborated with back-end developers to streamline data exchange between the server and front-end components.

Lagos Water Corporation, National Youth Service Corp (NYSC) / Quality Control Officer

AUGUST 2018 - JUNE 2019, LAGOS

Here are some of the things I did:
- Worked in the quality control department.
- Carried out Physicochemical analysis of water samples.
- Carried out Microbiological analysis water samples.
- Carried out analysis of samples needed for Production.
- Prepared reagents needed for analysis.

Honeywell Flour Mills PLC / Quality Assurance Officer

October 2016 - December 2016, LAGOS

Here are some of the things I did:
- Worked in the quality control department.
- Assisted in monitoring safety of materials used for production.
- Assisted in monitoring safety of production process and packaging materials.
- Assisted in carrying out proximate and microbial analysis of products.

Education

University of Lagos / Second Class Upper Degree

2013 - 2018, LAGOS

Silver Fountain College / Senior School Leaving Certificate

2006 - 2012, LAGOS

Omoleye Children's School / Primary School Leaving Certificate

1998 - 2005, LAGOS

Certification

FreeCodeCamp/www.freecodecamp.org

2020

- **API And Microservice Certification**: Managing Packages with Npm, Basic Node and Express MongoDB and Mongoose

- **DATA Visualization Certification:** Data Visualization with D3,JSON APIs and AJAX
- **Front End Libraries Certification:** Bootstrap, JQuery, Sass React, Redux
- **Responsive Web Design Certification:** Basic HTML and HTML5, Basic CSS, APPLIED Accessibility in User-Interface, Applied Visual Design, CSS flexbox, CSS grid.
